
Florida Municipal Pension Trust Fund – DB 50% Equity Allocation
Executive Summary
As of March 31, 2019

50% Equity Allocation

- The equity markets rebounded from their painful fourth quarter, helping the 50% Equity Allocation to outpace the Target Index (up 8.3% vs up 7.8%) in the first quarter. This allocation posted strong results fiscal year to date, outperforming the Target Index by 25 basis points while ranking in the top 4th percentile of the public fund peer group.
- While this allocation has struggled to keep up with the public fund peer group over the past 3 years (up 8.1%), it has outpaced the Target Index (up 7.5% vs 7.3%).
- Over the past 10 years, this allocation is up 8.5% on average annually. While this performance is modestly behind objectives, the risk controlled nature of many of the underlying strategies are designed to provide downside protection should the markets moderate or decline.

FMLvT Broad Market High Quality Bond Fund

- The Broad Market High Quality Bond Fund (up 2.1%) struggled to keep up with the BloomBar US Aggregate A+ benchmark (2.5%) in the first quarter. However, this strategy matched the performance of the benchmark over the past year, both up 4.4%.
- The fund has displayed a consistent pattern of performance, posting absolute returns of 2.9% on average annually over the past 10 years. This slightly trails the benchmark (up 3.4%), with the high quality focus providing a headwind, particularly over the past several years.
- The portfolio's conservative risk profile and high quality bias are in line with the objectives for this fund. This bias has rewarded investors in the form of a more favorable relative risk-adjusted return comparison over the long-term.

FMLvT Core Plus Fixed Income Fund

- The Expanded High Yield Bond Fund struggled to keep pace with the BloomBar High Yield 2% Constrained Index and the high yield bond peer group in the first quarter, as poor security selection and modest exposure to the strongly-performing lowest quality sectors hindered results.
- The fund has turned in strong absolute returns over the past 3 years, rising 6.1% and capitalizing on the robust performance in the high yield marketplace. Over the past 10 years, this fund has far outpaced the returns of the other FMLvT fixed income options, returning 9.0% annually.
- While performance has failed to keep pace with an even more rapid advance in the benchmark and peer group since inception, the strategy's modest risk profile offers downside protection and has resulted in favorable comparisons on a risk-adjusted basis.

Florida Municipal Pension Trust Fund – DB 50% Equity Allocation
Executive Summary
As of March 31, 2019

FMLvT Diversified Large Cap Equity Portfolio

- The Diversified Large Cap Equity Portfolio was created in October 2017. The fund is allocated 60% to the Intech US Broad Enhanced Plus Fund, and 20% each to the Hotchkis & Wiley Diversified Value Fund and the Atlanta Capital High Quality Growth Fund. This fund provides investors with exposure to core, value, and growth opportunities within the US large cap equity space.
- This strategy bounced back from a very difficult fourth quarter, outpacing the Russell 1000 Index by nearly 150 basis points while ranking in the top 10th percentile of the US Large Cap Core Equity managers in the first quarter of 2019.
- Exposure to US large cap growth stocks has been extremely additive over the most recent time periods with the Atlanta Capital High Quality Growth Fund posting the strongest 1 year results (up 21.3%) of all equity accounts in the FMLvT lineup.

FMLvT Diversified Small to Mid Cap Equity Fund

- This strategy nearly recouped the losses experienced in the fourth quarter, achieving a 16.2% return in the first quarter, which outpaced the SMID Benchmark (up 15.8%). Over the past 5 years, the fund has outperformed the benchmark by nearly 560 basis points while ranking in the 2nd percentile of its peer group of US Small-Mid Cap Core Equity managers.
- This strategy has generated very strong results over the past 10 years, rising 19.1% on average annually compared with 16.1% for the benchmark. Furthermore, the fund ranked in the top 9th percentile of its peer group, with a more modest risk profile and very strong risk-adjusted returns.

FMLvT International Equity Portfolio

- In October 2017, a ten percent allocation to emerging markets (Wells Capital Berkeley Street Emerging Markets Fund) was added to this portfolio.
- The portfolio rebounded from the difficulties it faced in the fourth quarter, and outperformed the MSCI ACWI ex US in the first quarter (up 13.2% vs 10.4%) while also ranking in the top 15th percentile of its peer group. With the headwinds that the international equity markets have faced over the past year, this portfolio has protected on the downside, achieving nearly 120 basis points of excess return over the benchmark.
- This portfolio failed to keep up with the international markets over the past 10 years, but has posted strong absolute returns over that time (up 7.2% on average annually).
- This strategy is intended to provide strong diversification across the broad spectrum of equity markets outside the US, with exposure to both developed and emerging markets.

FMLvT Core Real Estate Portfolio

- This fund was added to the FMLvT lineup in March of 2018 with the objective to provide broad exposure to the core commercial real estate markets.
- In June 2018, the manager (Morgan Stanley Prime Property Fund) called down an additional commitment of \$75 million which increases the total commitment thus far to \$100 million.
- The FMLvT Core Real Estate Portfolio (up 1.3%) outperformed the NFI ODCE Net benchmark (up 1.2%) in the first quarter, and has outpaced the benchmark by 127 basis points in the 1 year since inception.

Florida Municipal Investment Trust
Protecting Florida Investment Act - Quarterly Disclosure
As of March 31, 2019

This Disclosure is intended to provide information with respect to Chapter 175 and 185 Police and Fire Plan's required disclosure of direct or indirect holdings in any "scrutinized companies" as defined in the FSBA PFIA Quarterly Report for Quarter 1 2019.

It is important to note that individual Police and Fire Plans have no direct interests in any scrutinized companies. Police and Fire Plans hold an interest in the Florida Municipal Pension Trust Fund. It is also important to note that the Florida Municipal Pension Trust Fund has no direct interests in any scrutinized companies as all of its interests are invested in the Florida Municipal Investment Trust.

The Florida Municipal Investment Trust is the only entity that could possibly have direct interests in any scrutinized companies. ACG has reviewed the **Protecting Florida's Investments Act (PFIA) Quarterly Report- January 29, 2019** that is available on the Florida SBA website. In particular we have reviewed the list of companies appearing in **Tables 1 and 3- Scrutinized Companies with Activities in Sudan and Iran**, and compared these lists to securities of companies held directly by the Florida Municipal Investment Trust. As of 3/31/19, the Florida Municipal Investment Trust had no direct interest in securities on the above referenced lists.

ACG also requested that investment managers, who manage commingled funds that are owned by the Florida Municipal Investment Trust, review the **Protecting Florida's Investments Act (PFIA) Quarterly Report- January 29, 2019** and disclose whether the Florida Municipal Investment Trust may hold any scrutinized companies indirectly through investment in their respective commingled funds. The Florida Municipal Pension Trust holds units in the FMLvT Core Plus Fixed Income Fund. The FMLvT Core Plus Fixed Income Fund owns units in the Amundi Pioneer Global Multisector Fixed Income Fund. The Amundi Pioneer Global Multisector Fixed Income Fund does hold one security on the list, **Sinopec Group Overseas Development**, which represents 0.14% of the market value of their portion of the FMLvT Core Plus Fixed Income Fund. The Florida Municipal Pension Trust also holds units in the FMLvT International Equity Portfolio. The FMLvT International Equity Portfolio owns units in the Investec International Dynamic Equity Fund and the Wells Fargo Emerging Markets Large-Mid Cap Equity Fund. Both the Investec International Dynamic Equity Fund and the Wells Fargo Emerging Markets Large-Mid Cap Equity Fund hold **CNOOC Ltd**, which represents 2.08% and 1.38% of their respective portions of the FMLvT International Equity Portfolio. All other managers have confirmed that they do not hold any of these securities.

Global Long-Only Equity

Global equity markets came out of the gate hot this year following the sharp year-end 2018 sell-off with a 1Q-19 advance of 12.3% for the MSCI ACWI. On a style basis, Growth equity returns exceeded Value peers as a risk-on mentality re-entered the market on renewed hope for continued global expansion despite the ongoing lack of clarity regarding trade talks and Brexit.

Domestic **Small Cap equities posted the strongest gain** this year following the sharpest decline in the 2018 sell-off with a 14.6% increase in the quarter. Large cap equities trailed slightly with a gain of 13.7% for the S&P 500. Following the quarter's upside, one-year returns for these domestic indices have all reverted back to positive territory.

In International markets, **Emerging Market pressures abated** with a gain of 10.0% for the MSCI EM Index in 1Q-19. This return was relatively in-line with Developed Market returns of 10.1%. Currency impact was muted this quarter and somewhat of a mixed bag with EM experiencing a slight tailwind while Developed International markets continued to face a slight headwind. Following ongoing difficulties in International Markets and strong currency headwinds last year, one-year returns remain in the red in US dollar terms.

Global Equity Markets Rebound in 1Q19

Sources: Bloomberg, ACG Research

Global Long/Short Equity

Market Volatility Expectation as Measured by VIX

Sources: Bloomberg, ACG Research

After a brief return in 4Q-18, **volatility has again sunk down below the 20 year average**. Buoyed by a strong equity rebound in 1Q-19 and supported by positive market indicators, investor consensus seems to agree that the potential for a recession has been pushed back into 2020.

Equity long/short managers are optimistic about the opportunity set and have a positive view on the economy. This is reflected by gross exposure that has rebounded from multi-year lows in 4Q-18 and is back above historical average levels. Much of this increase has been in non-US equities, as **exposure to Europe has increased and exposure to China has reached multi-year highs**. One exception to the increased exposure is Event Driven managers, as gross exposure to the strategy is at multi-year lows, partially due to concerns that investors are overpaying for acquisitions.

A positive sign for equity long/short managers (and for stock pickers in general) is that **fundamentals have started to matter again**. As stocks are rewarded or punished commensurate with the positive or negative news they report this creates an opportunity set with **dispersion between top and bottom companies, creating potential for managers to make money on both longs and shorts**. On the short side, despite a pause in interest rate increases, rates have reached a level where managers once again can earn rebates on their short portfolios (after not receiving a rebate on short sales for over a decade due to low rates).

Technology and Health Care remain key areas of interest as historically there has been a large amount of dispersion between winners and losers in these sectors.

Global Private Equity

Valuations remain high for new deals in private markets, with an average purchase price multiple of 10.6x EBITDA and leverage of 5.8x, both of which are near historical highs. Private valuations appear to have held in much stronger than public markets in the aftermath of December's stock market weakness. The **median acquisition price for a private equity-backed company purchased in 1Q-19 was 10.4x EBITDA**, down from 2018's average, though leverage levels remain elevated.

Rising interest rates combined with the possibility of slowing economic growth continue to pose risks to private equity-backed companies. **High purchase prices are also likely to translate into lower returns for select vintages.** The best managers recognize that **high multiples are unlikely to continue indefinitely and that patience and asset selection is key to driving strong investment outcomes** in this environment.

All eyes in venture capital were focused on the IPO of Lyft in late March, looking for indications of the market's receptiveness to a coming "unicorn stampede" as highly valued venture-backed companies seek to list publicly. Demand for the IPO was exceptionally strong as **the listing was oversubscribed and priced above the original target range of \$62-68.** Though initial trading was strong, **the stock closed below its initial price of \$72 per share on its first full day of trading.** If the next unicorn to go public also trades off following its IPO, investors may become sufficiently nervous to delay or even prematurely end the stampede.

Purchase Multiples and Leverage Remain Elevated

Sources: S&P LCD, ACG Research

Global Real Assets

NCREIF Income Return Spread to Treasuries

Sources: NCREIF, ACG Research

US real estate assets have seen slowing appreciation, though strong economic fundamentals and limited new supply have been supportive of Net Operating Income. The NCREIF Property Index is expected to post its 36th consecutive quarter of positive appreciation in 1Q-19. This is 14 quarters longer than the second longest winning streak since the benchmark's inception in 1978. In 4Q-18, NCREIF annualized income returns (a proxy for cap rates) were flat at 4.4%. **As interest rates reversed their recent rise, the spread between NCREIF income returns and the 10-year US Treasury yield widened by 38 bps to end the quarter at 176 bps, still approximately 104 bps tighter than the median spread since 2000.**

Though there have been no significant impacts to real estate valuations so far, **more prolonged periods of higher interest rates could put upward pressure on cap rates and lower future real estate returns.** Real estate market fundamentals remain relatively solid, with no imminent signs of a dramatic imbalance between supply and demand outside of the long-challenged retail sector, while industrial assets in key markets continue to enjoy above-trend appreciation. **Cap rates remain near their all-time lows, and while further cap rate compression is possible, core real estate funds focused on income may outperform those focused on generating appreciation in the intermediate term.**

The Bloomberg Commodity Index (BCOM) rose 6.3% in 1Q-19, outperforming the Bloomberg Barclays US Aggregate Bond Index by 3.4% and underperforming the S&P 500 and MSCI ACWI by 7.4% and 5.9%, respectively. **Any signs of rising inflation may be positive for commodities broadly, though growing concerns regarding slowing global economic growth, the strength of the US dollar, and trade tensions may drive continued volatility in the near term.**

Global Traditional Bond Markets

From risk-free rates to lower-quality credit, everything across the fixed income landscape worked in 1Q-19. While taking no action on short-term interest rates, the more “patient” tone of **Federal Reserve’s** communication completed the dovish pivot that had been foreshadowed in late-2018. The Committee’s dot-plot removed previously anticipated rate hikes throughout 2019, with an even more cautious futures market actually pricing in policy easing by year-end. **US Treasury yields continued lower, as the yield curve flattened further.**

Even as general market volatility settled, the **BloomBar Aggregate** responded well to the decline in interest rates. Total returns for the quarter were impressive at 2.94%, and were further aided by ~35 bps of spread tightening in IG corporate credit. Notable declines in both rates and spreads caused the benchmark’s yield-to-worst to fall back below 3.0%.

High Yield bonds participated in the generalized re-risking by investors, with strong inflows into the category causing spreads to tighten by ~135 bps during 1Q-19. A more notable focus on liquidity led to the ongoing underperformance of CCC-rated issues.

Municipal Bonds performed well, despite lagging taxable counterparts as rates moved rapidly lower in March. The tax-exempt yield curve remains somewhat steeper than that of US Treasuries, but yield ratios out to 10-years trade historically rich given robust demand.

Unhedged Global government bonds underperformed as US dollar strength tempered the benefit of lower-trending yields. **Emerging Market** categories were solid, but differentiated.

Global Nontraditional Fixed Income

Percentile Rankings of Observations for Past 15-Years

Liquid Absolute Return strategies produced steady results in 1Q-19, with relatively credit-heavy funds outperforming peers that have adopted a more conservative risk posture. Given typically modest duration exposures, and amid the late rally in US Treasuries, most within the category continued to fall short of traditional bond benchmarks. That said, the **diversification of risk factors within portfolios remains valuable**, as this aids in downside protection and reduces key correlations. Achieving full-cycle alpha objectives may be challenging, but **enhanced volatility in rates, spreads, and currency should provide opportunities** to outperform risk-free cash.

Following the 4Q-18 drawdown, **Long/Short Credit** strategies entered 1Q-19 with pared-down risk exposures. Some managers expressed frustration as the speed of the market rebound in early 2019 prevented them from deploying capital into assets that experienced meaningful, albeit short-lived valuation declines. Sentiment varies, but many credit hedge fund managers remain cautious. Despite the reduced level of risk on manager balance sheets, **we expect talented managers will find opportunities to add value regardless of market directionality** via relative-value trades and tactical trading opportunities.

Private Credit strategies (typically 5- to 10-year fund life) offer the opportunity to earn both a credit spread and an illiquidity premium versus publicly traded fixed income strategies. **1Q-19 saw a recovery in market dynamics for new issue levered loans** as spreads tightened and volume increased in response to improved equity market conditions. That said, the reduced likelihood of further short term interest rate increases may pressure spreads. **Although default rates have remained low, the ongoing volatility in the market may indicate the beginnings of investor concern around the possibility of a coming distressed cycle.** Due to the high-leverage, covenant-lite loans issued over the last several years, recoveries may be worse as companies are allowed to operate longer without previously customary capital preservation requirements.
